Pfaff 145

PFAFF INDUSTRIEMASCHINEN GMBH KAISERSLAUTERN

Foreword

All component parts are grouped together as they are arranged in the sewing machine.

All underlined part numbers signify assemblies which are made up of several component parts.

An asterisk (*) preceding the part number indicates that the part in question is not interchangeable with a similar part used on previous machines which is listed on p. X. If the part to be replaced on a previous machine is listed on p. X under its old part number, order a replacement part under this number. If not, order the latest version of this part under its current number.

It is absolutely necessary that the ten-digit part number be stated on all orders for spare parts. The central portion of this number, as a rule, is identical with the old part number. In exceptional cases, the old part number is listed in parenthesis below the new ten-digit part number.

Part number changes will be published on correction sheets and disseminated with our circulars.

Subject to alterations in design.
